

### ***"Purpose Driven Manufacturing"***

#### ***ABOUT US. . .***

COARC, the largest provider of programs and services to individuals experiencing disabilities in Columbia County, New York, established COARC Contract Manufacturing in 1989 as a custom injection molder. COARC Contract Manufacturing provides a full range of competitively priced services that complement our molding operations to include a variety of quality products and custom assembly services.

As an ISO 9001-2000 certified and FDA registered facility, our expertise is backed by a strong labor force with qualified personnel guaranteeing a quality, on-time product. COARC Contract Manufacturing is housed in two modern, air-conditioned facilities with a combined space of 62,000 square feet, fully equipped to meet our customer's needs. Our injection molding process features state-of-the-art molding equipment, incorporating robot interface and closed loop processing. Additionally, a full range of ancillary equipment such as sprue-pickers, dryers, mold temperature controllers, and automated parts handling equipment is available to service the requirements of every customer.

#### ***In need of value-added services?***

COARC Contract Manufacturing also provides a variety of custom services such as:

- pad printing
- hot stamping
- custom packaging
- custom shipping options

Whether you require custom injection molding, high volume assembly, or specialized lower volume items, our goal is to ensure a quality product - first time, every time.
